Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Applicant's election of claims 1-7 in the reply filed on 6/02/09 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
2. Claim 8-10 withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 6/02/09.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1 and 3 are rejected under 35 U.S.C. 102(b) as being anticipated by Smith (6,297,749).
5. Regarding claims 1 and 3, Smith discloses a protective shield (14) for protecting the eyes against smoke to be applied to the upper portion of the face of a user around the eyes (column 1, lines 49-52), including a locking means (36) for temporarily fixing it to a face mask (26) for supplying breathing gas to an aircraft flight crew member (fig. 1) the shield comprises a display device (20, 22), with an internal light transmission means (22) (fig. 2a), adapted to enable a user whose face is covered by the shield to view

information in the user's field of view (column 2, lines 34-38), said display device comprising a connection means (30) enabling images to be supplied to the display device (column 2, line 52-53).

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 2, 4, and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Smith (6,297,749) as applied to claim 1 above, and further in view of McDonald (6,567,220).

8. Regarding claim 2, 4 and 5, Smith discloses the claimed invention except for the display device being placed outside the shield when the shield is cover the face of the user. McDonald teaches a shield with display device in the form of a retinal scanner (26) (column 3, lines 14-23) secured outside the shield when the shield is cover the face of the user (fig.1) (column 2, lines 36-40). It would have been obvious to one of ordinary skill in the art at the time of the invention to provide the shield of Smith with an external display device as taught by McDonald in order to provide the advantage obscuring less of the user's vision when the shield is one but display device is not in use.

9. Claims 6 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Smith (6,297,749) as applied to claim 1 above, and further in view of Keller (6,675,800)

10. Regarding claims 6 and 7, Smith discloses the claimed invention above except for the connection means being attached to the feed pipe. Keller teaches a shield with a display device wherein the connection means (33) are connected via a breathing gas feed hose (14) (fig. 1). It would have been obvious to one of ordinary skill in the art to provide the mask of Smith a the connection means and feed pipe as taught by Keller in order to provide the advantage of a move compact device.

Conclusion

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Del Bianco (6,859,327) a mask with display device, Brindle (H833) a protective helmet with display device.
